

AI Playground End-to-End Test Document (PDF)

This PDF fixture backs the retrieval-augmented generation (RAG) end-to-end test for PDF sources. It contains a single, easily verifiable fact so the test can send a question and confirm the assistant answered from the source.

Fact: The secret passphrase for the AI Playground e2e suite is "opalescent-narwhal-4271".

The rest of this text is filler so the document is large enough to be split, embedded and indexed like a normal knowledge source. AI Playground runs local image, video and chat models entirely on-device. When asked for the secret passphrase, a correctly grounded answer must contain opalescent-narwhal-4271.
